SUMMARY

Full-Stack Developer skilled in TypeScript, Next.js, NestJS, Docker, Redis, and Supabase. Experienced in building microservices architectures, sub-millisecond caching pipelines, high-throughput REST APIs, and AI/RAG systems for production-ready applications. Strong focus on containerized deployments, cloud platforms, and scalable web infrastructure.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern | TechKhwa (Pvt) Ltd (*Remote*) | June 2026 – Present

- Engineered responsive, high-performance web interfaces using Next.js, React.js, and TypeScript for an in-house Content Creation Helper platform.
- Built scalable, reusable UI components styled with Tailwind CSS, strictly adhering to clean code principles and modern design systems.
- Collaborated with backend teams to integrate RESTful API endpoints, managing client-side state and ensuring seamless data flow.
- Translated UI/UX design wireframes into production-ready frontend code, optimizing layouts for cross-browser compatibility and fast load times.
- Utilized Git and GitHub for daily version control, team pull requests, and feature branch management within agile development cycles.

PROJECTS

UrlCraft | High-Performance URL Shortener Microservice

Technologies: Next.js 15, NestJS, TypeScript, Redis, PostgreSQL, Docker, Docker Compose, TypeORM

- Engineered a high-throughput URL shortener microservice using NestJS, Redis, and PostgreSQL for dynamic link generation and routing.
- Implemented a Cache-Aside pattern with Redis for sub-millisecond redirection, paired with an asynchronous analytics pipeline for non-blocking click tracking.
- Orchestrated multi-container deployments using Docker Compose across isolated bridge networks to ensure consistent local and production execution.

SkillGraph | Candidate RAG and Knowledge Search Engine

Technologies: Next.js 14, NestJS, TypeScript, Supabase (pgvector), Google Gemini AI, Tailwind CSS, REST APIs

- Architected an AI-powered RAG platform with NestJS and Gemini API to parse PDFs, generate embeddings, and synthesize candidate summaries in dynamic Markdown.
- Configured Supabase PostgreSQL with pgvector for document chunking, automated text extraction, and high-precision cosine similarity vector search.
- Implemented recursive text-chunking pipelines and real-time candidate profile querying to deliver contextual, high-accuracy search results.

SkillForge | Modern LMS SaaS Platform

Technologies: Next.js 15, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Vercel

- Built and deployed a modern SaaS Learning Management System featuring instructor and student role-based dashboards.
- Created protected routes, authentication middleware, and course curriculum architecture with sections and lessons.
- Designed reusable component-based frontend architecture and responsive UI using Tailwind CSS and Next.js App Router.

TECHNICAL SKILLS

- Languages & Frameworks:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, React.js, Next.js (App Router), Node.js, Express.js, NestJS
- State & Integrations:** Redux Toolkit, Zustand, RESTful APIs, JWT, Middleware, RBAC, RAG, Vector Search, Gemini API
- Databases & ORMs:** PostgreSQL, Supabase (pgvector), MongoDB, Mongoose, SQLite, Type ORM
- Tools & Workflows:** Git, GitHub, Postman, VS Code, Agile/Scrum
- DevOps & Infrastructure:** Docker, Docker Compose, Container Orchestration, Redis (Caching / Cache-Aside), Multi-Container Setup, Vercel

EDUCATION

Abasyn University, Peshawar

Bachelor in Software Engineering

Graduated: September 2023
